

Projects

Al Jalila Foundation HQ Building

Client: Al Jalila Foundation

Project name: Al Jalila Foundation HQ Building

Highlights: 3B + G + 10 floors

Location: Dubai Healthcare City, Dubai, United Arab Emirates

About

The project consist of a 10-storey building, the first standalone research centre in the UAE with three floors of research laboratories, as well as clinic spaces, administration etc.

Scope of work

Scope of work consists of design verification, engineering, procurement, installation, testing and commissioning of all MEP Services for the building. We have installed air conditioning and ventilation system , BMS ,PDFF and electrical services . It has been designed to accommodate bio-hazard containment Level 2 research laboratories, to international best practice standards with specialist secondary laboratory functions varying per floor. The facility also provides underground car parking, building services plant, laboratory technical areas and office accommodation, as well as serving as the Al Jalila Foundation Headquarters.
