About

Scope of work consists of design verification, engineering, procurement, installation, testing and commissioning of all MEP Services for the building. We have also installed air conditioning with hygienic AHUs & FAHUs (DIN Certified), BMS and electrical services for 8 state of the art operation theaters, a high tech nursery with a capability to hold 70 new borns that are individually remotely monitored through CCTV, radiology lab, Cat center for Cardiology and an industry leading laboratory. The hospital also contains special royal suites to cater to the high end patients in the United Arab Emirates.
