About

We are serving our client- ADMM (Abu Dhabi Motor Sports Management) at the Yas Marina Circuit in Abu Dhabi. We were responsible for complete HVAC maintenance on-site wherein we are maintaining HVAC units with 8000 ton of refrigeration load including 7 heat exchanges. Yas Marina circuit hosts the Abu Dhabi Grand Prix (F1 Race) annually in November with one of the highest footfalls amongst all F1 race tracks with an average footfall of ~150k/year. The event is covered live worldwide and maintenance of HVAC systems behind the scenes is critical to successful and smooth functioning of this major event.

Scope of Work

Reactive & Planned preventive maintenance of the following systems:

Heat Exchangers, Chilled Water Pumps, Pressure Vessels, VFD, MCC Panel, Booster Pumps, Filter Pumps, Circulation Pumps, Submersible Pumps, VRF, AHU, FCU, Split Unit, SPF, LPF Exhaust, Package Unit, Air Curtains, Smoke Exhaust Fan, Video Wall Split ACs.

*What's your Challenge?
Let's work together to solve it.*
